# Navigating Congested Environments with Risk Level Sets

Alyssa Pierson, Wilko Schwarting, Sertac Karaman, and Daniela Rus

**A more aggressive driver chooses a higher risk threshold, and has a larger planning space**

artificial intelligence in motorsport

extreme environments that push technology beyond human limits

and then what?

transfer those innovations to human driven cars

why?

# Top ten causes of death among people aged 15–29 years, 2012

“By 2030, on current trends, another 1.3 million global road deaths,  
this gives us another 14 million by 2030.”

*–Matthew Baldwin, European Road Safety Coordinator*

“By 2030, it will be the 5th largest cause of death,  
up there with cancer, heart disease.”

*–Matthew Baldwin, European Road Safety Coordinator*

DevBot 2.0 the world's first human robotic prototype race car

automated, augmented, assisted, adapted

automated = beyond acceptable human risk

James Ward - Advanced Driving Instructor

augmented = parallel/shared autonomy

15:41

the greatest motorsport challenge?

**24h**  
**LE MANS**

One of the most complex racing environments in the world;  
60 cars, four performance categories, 180 drivers, four skill levels,  
380 laps of 13.626km, 38 corners, day & night, wet & dry for 24hrs.

AI enhanced driving experiences

risk versus reward

assisted = enhanced situational awareness

assisted = augmented reality

THE AUGMENTED REALITY INTERFACE ILLUSTRATION IS SUBJECT TO CHANGE

adapted = reimagining human control

beyond mechanical control

superpowers

A person is seen from behind, wearing a VR headset and driving a car. The car's interior, including the steering wheel, is visible. The VR headset displays a virtual landscape of a winding road through green hills under a blue sky with clouds. The person's hands are on the steering wheel, and they are looking forward at the virtual horizon.

“When most people think about autonomous driving, they have a very impersonal vision of the future, where humans relinquish control to the machines. Yet B2V technology does the opposite”

– Nissan - Executive Vice President, Daniele Schillaci
